

...And I Need to Be With Someone Tonight

Terence Trent D'Arby

Shine on your light
Lead me to your home Lower your sights
Put away your comb Though black babies are starving
And cows fed for the carving All I know is I'm lonely
And I need to be with someone tonight Lift up your chin
Let me see your eyes Words are not my yen
My tongue is often tied Though apartheid's a greater issue
I long to hear "I miss you" All I know is I'm lonely
And I need to be with someone tonight Till men stop being intimidated
By women who have made it All I know is I'm lonely
And I need to be with someone tonight
