

Go Quietly

Cold War Kids

"Talk to me," well all I could say,
Is I need a few days of quiet and space
Now that I'm here restless in chains
It could have been fun if it wasn't so strange And now you wanted to share your life
And now you want to be free to fly
But no you can't have them both
Tonight decides what tomorrow knows I could become some other man
You easily crush in the palm of your hand
Or one who puts you in the ring
Or runs away, runs away, runs when you swing And now you wanted to share your life
And now you want to be free to fly
It's sort of nothing you know
Tonight decides what tomorrow knows Keep up with me baby
I would never want to force your hand
It's a mystery to me
In a language that you understand And now you wanted to share your life
And now you want to be free to fly
But no you can't have them both
Tonight decides what tomorrow knows
Tonight decides what tomorrow knows
Tonight, tonight, tomorrow knows
Tonight decides what tomorrow knows
Tonight, tonight, tomorrow kows Keep up with me baby
I would never want to force your hand
It's a mystery to me
In a language that you understand Keep up with me baby
I would never want to force your hand
It's a mystery to me
In a language that you understand
