

You Should Learn

We Are Scientists

All the little debts that you owe to yourself
Are never gonna be paid
The promises you set but can already tell
That you are going to break You get what you deserve and I guess that's your problem
It's nice to teach and learn, I suggest you get on it
This doesn't really work, let's be perfectly honest
So maybe you should learn, maybe you should learn
Learn, learn, learn You plotted out the steps that you swore to yourself
That you were going to take
But all the things you get, surely all of it sells
And they're not going to waste You get what you deserve and I guess that's your problem
It's nice to teach and learn, I suggest you get on it
This doesn't really work, let's be perfectly honest
So maybe you should learn, maybe you should learn
Learn, learn, learn 'Cause we all have a soft spot
For miracle cures that we hope keep coming
We all have a soft spot
For lyrical words that we know mean nothing
We all have a soft spot You get what you deserve and I guess that's your problem
It's nice to teach and learn, I suggest you get on it
This doesn't really work, let's be perfectly honest
So maybe you should learn, maybe you should learn Maybe you should learn, maybe you should learn
Maybe you should learn
Learn, learn, learn
