

We Got the Right to Roll

Dirty Dave Osti

I was wearing sunglasses just like I did the night before
green are the grasses lookin for a place to get some more
when a flashing red light pulled beside my car and held me down
when I rolled down the window somebody said-You got the right to roll
You got the right to roll
You got the right to roll
You got the right to rollGonna see old lucy theres something goin on with her little eyes
she can't take no medicine for all she knows the doctor's telling lies
but the man he can't believe it the mayor's comin down the guvn'r too
you know she ain't no heathen don't tell her what to do-She got the right to roll
She got the right to roll
She got the right to roll
She got the right to rollYeah.Don't mess with mother nature she'll always be one step ahead of you
the butcher is the baker he makes the world and tears your life in two
somebody needs a crutch somebody needs a place to put the blame
when I drove to massachusetts guess what they saidWe got the right to roll
We got the right to roll
We got the right to roll
We got the right to rolleverybody got the right
why don't you see the light.
