## **Chick Lit**

## **We Are Scientists**

I wouldn't be caught dead with your kind And all the hot shot carrying on that you do It's your only moveI wanna see you all buried alive And I'll be up top carrying on over you Only for youI asked you nicely once but I won't do that again I asked you nicely once but I won't do that again If after all we still have high hopes and all is forgiven, if all is forgiven I asked you nicely once but I won't do that againYou know that we've got some axes to grind We've got some sharp tongue carrying on to do It's your only moveI wanna see you all buried alive And I'll be up top carrying on over you Only for youI asked you nicely once but I won't do that again I asked you nicely once but I won't do that again If after all we still have high hopes and all is forgiven, if all is forgiven I asked you nicely once but I won't do that againI asked you nicely once but I won't do that again I asked you nicely once but I won't do that again If after all we still have high hopes and all is forgiven, if all is forgiven I asked you nicely once but I won't do that again, again
