Bone Will Break Metal

Ginger Ninja

Take it back that's what she said
The mind will make, will make you pay
Listen when our time is through
Happy be the me in youTake it back you've lost your ground
You'll find it where the sun goes down
Listen when our time is through
Time is through
Time is throughCould it be something that she said
(Bone will break metal)
That we could be anything anything
(Bone will break metal)Building up your binded thoughts
Our bodies tied by steel cords
Break a chain to set them free
Wounds will heal eventuallyWill it fall apart
as we emphasize the fact
some things are just meant to go wrong
Will it break when our time is through?
Time is through
Time is through
Time is through
Time is throughCould it be something that she said
(Bone will break metal)
That we could be anything anything
(Bone will break metal)Could it be something that she said
(Bone will break metal)
That we could be anything anything
(Bone will break metal)Bone will break metal
Bone will break metalCould it be something that she said
(Bone will break metal)
That we could be anything anything
(Bone will break metal)Visions caught up inside my head
(Bone will break metal)
We could be anything anything
(Bone will break metal)
