

Let It Fall

Nevertheless

We wear it on our face
We keep up with the pace
And don't slow down

Perfection without grace
Is such a lonely place
To be found

We go 'round and 'round
And never really move at all

(Chorus)
Oh, we are bruised
And destined to lose
From doing this alone

And oh, let it fall
And cover us all
In grace that's not our own

See it in our eyes
We're running for the prize
Don't burn out

Without a hand to hold
We'll never really know
What life's about

We go 'round and 'round
And never really move at all

(Chorus)
Oh, we are bruised
And destined to lose
From doing this alone

And oh, let it fall
And cover us all
In grace that's not our own

Let's live like we're alive
We'll take the pain and stride
We'll learn from our mistakes
And be glad we ever tried

Live like we're alive
Live like we're alive
Run with him in to the night

(Chorus)
And oh, we are bruised
And destined to lose
From doing this alone

And oh, let it fall
And cover us all
In grace that's not our own

(Chorus)
Oh, we are bruised
And destined to lose
From doing this alone

And oh, let it fall
And cover us all
In grace that's not our own
