## **Jupiter**

## **Celestial Season**

Last night I went to Jupiter
and silently I stayed
until I caught the daybreak on the seventh moon
breathing in the juvenile
naked to the bone
sitting on the bottom of my soulOpen up to the sound on Celestials playgroundI'm reaching out to willpower staring at the strobe
I never thought that speed of life could kill my thoughts
trying to come clear now
my engine running slow
falling like a comet heading homeOpen up to this sound
let the magic come over
