

Snow Angel

[Tori Amos](#)

As the bell brought in midwinter I waited for a sign
A shadow of a wing this has always been The children know this
That she will come to them, to them, to them Snow angel, snow angel, snow angel
She'll make her way
And she'll stay for a time, for a time In the dark of this midwinter the moon slipped from night
A shadow of a wing, this has always been The children know this
That she will come to them, to them, to them Snow angel, snow angel, snow angel
She'll make her way
And she'll stay for a time, for a time The children know this
That she will come to them, to them, to them Snow angel, snow angel, snow angel
She'll make her way
And she'll stay for a time and it's time
