

Settle Down

Taylor Phelan

Within our body there's a core infection
And every time that we choose a side
It weakens the poor connection
To our hearts from our minds
We turn our back on our helpless brother
Then define him as a social class
It's human nature to divide each other
'Cause we're all afraid to finish last
I know it's hard sometimes
But we're making it worse
Let's try to see things from
The other side
Let's change it up
Or do you wanna see how far this goes?
We've had enough
All this blow-for-blow
Let's settle down settle down
Settle down
In every kingdom there's a crooked figure
That makes it easy to assign the blame
From the bottom it's an unfair picture
But in the end, you see, we're all the same
Can you be certain that you'd do much better?
It can't be easy to have all the power
Can we decide not to oppress each other?
Or it is bred into the skin of ours?
I know it's hard sometimes
But we're making it worse
Let's try to see things from
The other side
Let's change it up
Or do you wanna see how far this goes?
We've had enough
All this blow-for-blow
Let's settle down settle down
Settle down
Music
Let's change it up
Or do you wanna see how far this goes?

We've had enough
All this blow-for-blow
Let's change it up
Or do you wanna see how far this goes?
We've had enough
All this blow-for-blow
Let's settle down settle down
Settle down
