Sadness

Harmful

I'm not good enough I'm just clearing that up
call me curious and I wont blame you for trying to cut me out
your head is full of doubt my mouth is full of bloodAnd no one downBut I would get caught up on how it used to be
And find you leaving would drive me crazy
I wont get cut off following your lead
If half of the world comes crashing down on meI know a thing know a thing about sadness
I know how it feels how it feels to be alone
Just hold me tight yeah your the thorn in my side
till you go through it yourself you'll never knowI'm not good enough I'll just
spare you the details I'm making up
And I wont need you to ever come around
here your everything I fear
The criminal stealing all my hopeBut I wont get caught up on how it used to be
To find you leaving would drive me crazy
I wont get caught up following your lead
and even if I do you will only tell meI know a thing know a thing about sadness
know how it feels how it feels to be alone
Just hold me tight yeah your the thorn in my side
till you go through it yourself you'll never knowMy heart sinks down in to my stomach
Its the taste of the end even if I don't want it
My eyes close don't know what I'm becoming
Just a shadow of the person that I was beforeYou can use my bonesYou can use my bonesIf you want to put me back together againI know a thing know a thing about sadness
know how it feels how it feels to be alone
Just hold me tight yeah your the thorn in my side
till you go through it yourself you'll never knowI know a thing know a thing about sadnessI know a thing know a thing about sadness
