

The State Line

[Shannon McArthur](#)

It looks like you could use a morning sun, Pick it up and we'll drive all evening, fresh air with the windows down,
wo oh ah ah ohpop it in and I'll turn it up, Hanson my guilty pleasure
no way that you could measure how we'd be feeling
now ohthrow your hands up into the sky
this is the moment, you can live or die
but you gotta decide it's yours
freedom by force, get your freedom by force
get your freedom by force, come get itnow we're movin' it across the state
haven't had no fear to date
as long as you've got the pedal, I'll take the wheel
coming exit fifty-five, I'm feeling so alive
there's no place I'd rather be than under the sun
right now ohthrow your hands up into the sky
this is the moment, you can live or die
but you gotta decide it's yours
freedom by force, get your freedom by force
get your freedom by force, come get itor else you'll regret it
I know that you want it
all you gotta do is let it init looks like you could use a morning sun
pick it up and we'll drive all evening
fresh air with the windows down
wo oh ah ohthrow your hands up into the sky
this is the moment, you can live or die
but you gotta decide it's yours
freedom by force, get your freedom by force
get your freedom by force, come get itWritten by Shannon McArthur and Michael Getches
