Dark Star

Fightstar

This is our place, it is secret and secure,
There are chains to hold it down,
Heavy eyes will keep us warm
These bright lights won't save our lives they're showing us just misdirection,
(You're a dark star)
x2
The same pain, that I feel, there is nothing there at all,
I won't say how we got here, it is secret and secure.
These bright lights won't save our lives they're showing us just misdirection,
(You're a dark star)

x2
Firefly,
When everything's dead and gone,
We'll find place to hide from the bright lights.
Firefly,
When everything's dead and gone,
We'll find a place to hide in the dark.
These bright lights won't save our lives they're showing us just loose misdirection,
(You're a dark star)
x2
