

Audiblenarcotic

Vaux

Ex-president you've got to resign your throne

Your words won't die with me

Your words won't

Turning the tide in this round

Awaken to the last sound

Rumor has it talk of the town

You won't be missed

You won't be found

An audible narcotic

Sets these gears in motion

Your words won't die with me

Your words won't

When i decide what doesn't fly

That's when you lost your right

To pump this idea

This soulless thought nation wide

Telecast this dead air from a vantage hard to sight

Sudden silence confronts you.
