

# The Experiment

## Sepultura

Action speaks loud, louder than any word  
You need to watch it all, you need to learn It all  
False smiles, all hypocrits  
You know you paying all you need to watch your backDo you think he's cured  
Do You think he's sane  
Do you think he's free  
Do you think at all?  
Being you and not being me  
Is this way to cure a life so obscured?Experiment from the governament  
It's a moral sin of our societyExperiment from the government  
It's a moral sin of your society  
They're feeding lies to an empty mind  
A mind impelled to be good
