

# Shadows Of The Night

DJ Bobo

REFRAIN: Shadows of the night  
They are coming when the moon is shining bright  
Leave their graves as shadows of the night  
When the city is asleep  
No one knows the shadows of the night  
In the darkness they are flying side by side  
Silent crows are shadows of the night  
No one ever saw a face of the Shadows of the night  
RAP 1: Cemetery, it's one o'clock  
A wolf is howling on the distant rock  
It's time for the silent slaves  
Waking up to open their graves  
One, two, three and four  
Grave by grave, more and more  
Commemoration or transmutation  
Traces of last generation  
The shadows of the night have never died  
Unsatisfied  
They paid the highest price  
Waiting for another advice  
Never found final peace  
Their restless life will never cease  
When the moon is shining bright  
They leave their graves as shadows of the night (Refrain)  
RAP 2: The wind is howling through the trees  
The melody of tragedies  
Killed by sense the epitaph  
Sounds of sorrow when they're kick and left  
The shadows of the night are on their flight  
Never saw the light  
Silent strangers slow and fast  
Without future past  
Flying through the streets of an endless town  
The way to nowhere up and down  
People lock the doors of their floors  
Shadows are fast like a flying horse  
Short attack like a maniac  
Confused by the ghost in black  
When the moon is shining bright  
They leave their graves as shadows of the night (Chorus)
