Nightbreeder

Centinex

Forever my longing has been there
Like a sweet scenario of eternity
Bring forth the kingdom of fear and lies
Take me to the world where happines diesIn the abyss they feel the storming night
Sent with desire to the portal of powerNightbreeder - Firefeeder
Nightbreeder - The mass has begunIn the darkness
I seal the mark divine
Streaming crimson chaos
Spawned from a devilish signThousand demons, scornful legions of hate
Purest darkside shows the blackest way
Damnation appears, the flames are burning higher
Total grim existence, feed the dreams of demonic realmsNightbreeder - Firefeeder
Nightbreeder - The mass has begunIn the darkness
I seal the mark divine
Streaming crimson chaos
Spawned from a devilish signLike a thundering storm I follow the path of the freezing mist
Into the dark, out to the unknown
The voices are calling, waiting for me to come through
Nightbreeder - A part of a sinful hordeDepths of hell, the home of life unpure
We have risen awaiting the final call
Roar to the moon, gather around the throne
Take my soul, take me to the master belowNightbreeder - Firefeeder
Nightbreeder - The mass has begunIn the darkness
I seal the mark divine
Streaming crimson chaos
Spawned from a devilish sign
