Avalanche

Tristen

Mountain in an avalanche
Like an ancient rock you know you'll be straedo (?)
Way down
To the river's edge
Like an ancient tree you know you'll be straedo (?)
'Cause you know when it snows its just the rain drops falling down
Freezing up into tiny little forms
Cause you see that the light is just reflections in your eyes
And the dark is a place you can not know
When you find
That the river's dry
How you can not feed yourself with hope in the
Cause you know when it snows its just the raindrops falling down
Freezing up into tiny little forms
Cause you see that the light is just reflections in your eyes
And the dark is a place you can not know
And the dark is a place you can not know
Are you searching for somebody?
Are you searching for somebody?
Are you searching for somebody?
Are you searching for somebody?
Are you searching for somebody?
