Cynthia

Blue Rodeo

So you saw that fire in the sky Well, I think that's so cool And I know that nothing'll change you You are nobody's foolCynthia, won't you take me to Pyramid Lake with you? We could watch the spaceships Maybe they'd take us on a trip Into that never ending sky Into that wide and endless nightAnd you stood in their beam of light And they showed you the bones on the moon Well, I hope I get to go there With you real soonCynthia, won't you take me to Pyramid Lake with you? We could watch the spaceships Maybe they'd take us on a trip Into that never ending sky Into that wide and endless nightAnd we get there before the sun sets And we'd put up your tent Watch the stars dance all night

(Watch that sun comin' up)Cynthia, won't you take me to
Pyramid Lake with you?
We could watch the spaceships
Maybe they'd take us on a trip
Into that never ending sky
Into that wide and endless night
Into that wide and endless night

And watch that sun come up
