Pemdas Boss

The Rappin' Mathematician

Parenthesis then exponents,
multiply and divide,
then add and subtract,
PEMDAS is your guide!

Parenthesis then exponents,
multiply and divide,
then add and subtract,
and the answer canâ€™t hide!

Now donâ€™t get perturbed-
No need for frustration-
Just follow along with my song
â€˜bout order of operations!

No need to be scared, no need to be confused,
And tell you dear Aunt Sally that SHEâ€™S EXCUSED!!!

Now you canâ€™t put your shoes on, before your socks,
And I never heard music that was called roll nâ€™ rock!
Do you mean rock nâ€™ roll?

Now thatâ€™s exactly my point-
If you do things out of order,
Well then youâ€™re gonna disappoint!

And speaking of points, my point is this-
In math there is an order, yes an order that exists!
Itâ€™s called order of operations, and Iâ€™ll tell you how it goes-
And just like my rhymes, itâ€™s got a smooth flow!

Now you wanna be successful?
You wanna be the boss?
Youâ€™ll need order of operations, also know as PEMDAS!

Thatâ€™s P-E-M-D-A-S-
PEMDAS! PEMDAS! And it brings success!

The P is parenthesis, the E is exponent,
The M is multiply, thatâ€™s PEM- youâ€™ve got to own it!

The D is divide, and the A is addition,
the S is subtract, and you donâ€™ t need permission!

With The Rappinâ€™ Mathematician,
This all becomes a breeze,
â€˜cause the first thing you do,
is whatâ€™s inside the parenthesis!

Now that shrunken raised number, is your next component,
You know what Iâ€™m sayinâ€™- take care of the exponent!

Now multiply and divide, from left to right,
Yo, youâ€™re almost there, and the end is in sight!

Now from left to right, you must add and subtract-
Thatâ€™s called order of operations, to be exact!

Just take it nice and slow, for this is not a sprint,
The order that you follow, is im-por-tant!

Parenthesis then exponents,
multiply and divide,
then add and subtract,
PEMDAS is your guide!

Parenthesis then exponents,
multiply and divide,
then add and subtract,
and the answer canâ€™t hide!
