Right Here, Right Now

Maddie & Tae

Stop thinking 'bout it, been dancing all around it
Standing here at my door
And I know you want to, I know I want you
So what you waiting for?Cause I got a feeling and I think you're feeling it, too
Go on and steal it, my heart's ready for youYeah, I see you lean in, kiss me like you mean it
Don't just say goodnight
Standing face to face, it's just too good to waste
Go on and close your eyes
And put your lips on mine, there ain't no better time
Than right here, right now tonightNo reason to be shy, you don't even need to try
You had me from hello
You got the chance now, take it
It's your move for making
Don't let this moment goCause I got a feeling and I think you're feeling it, too
Go on and steal it, my heart's ready for youYeah, I see you lean in, kiss me like you mean it
Don't just say goodnight
Standing face to face, it's just too good to waste
Go on and close your eyes
And put your lips on mine
There ain't no better time
Than right here, right now tonightI got a feeling and I think you're feeling it, too
Go on and steal it, my heart's ready for youYeah, I see you line in, kiss me like you mean it
Don't just say goodnight
Standing face to face, it's just too good to waste
Go on and close your eyes
And put your lips on mine
There ain't no better time
Than right here, right now tonightRight here, right now tonight
