

# Right Here, Right Now

## Maddie & Tae

Stop thinking 'bout it, been dancing all around it  
Standing here at my door  
And I know you want to, I know I want you  
So what you waiting for? Cause I got a feeling and I think you're feeling it, too  
Go on and steal it, my heart's ready for you Yeah, I see you lean in, kiss me like you mean it  
Don't just say goodnight  
Standing face to face, it's just too good to waste  
Go on and close your eyes  
And put your lips on mine, there ain't no better time  
Than right here, right now tonight No reason to be shy, you don't even need to try  
You had me from hello  
You got the chance now, take it  
It's your move for making  
Don't let this moment go Cause I got a feeling and I think you're feeling it, too  
Go on and steal it, my heart's ready for you Yeah, I see you lean in, kiss me like you mean it  
Don't just say goodnight  
Standing face to face, it's just too good to waste  
Go on and close your eyes  
And put your lips on mine  
There ain't no better time  
Than right here, right now tonight I got a feeling and I think you're feeling it, too  
Go on and steal it, my heart's ready for you Yeah, I see you line in, kiss me like you mean it  
Don't just say goodnight  
Standing face to face, it's just too good to waste  
Go on and close your eyes  
And put your lips on mine  
There ain't no better time  
Than right here, right now tonight Right here, right now tonight
