

# Helicopter

## Steel Train

[Originally by M. Ward] i am somewhere in the city climbin' up a fire escape

see i am somewhere in the city climbin' up a fire escape

you know i got to save my baby from the mess that this world has made

oh i arrive through a window

leave through a hole in the wall

see i arrive through a window

leave through a hole in the wall

you know i got to save my baby as i carry her cradle and all

helicopter, helicopter

let your long rope down

you see i swing beneath the sunset

done all that i can do in your town

violence has taken wind out of my sails

violence has taken wind out of my sails

you know i got to save my baby from the mess that this world has made

helicopter, helicopter

let your long rope down

you see i swing beneath the sunset

done all that i can do in your town

i am somewhere in the city climbin' up a fire escape

see i am somewhere in the city climbin' up a fire escape

you know i got to save my baby from the mess that this world has made
