Blame

Diamond Rugs

You're sick and tired of my bar room ways
I thought I told you not to come home so late
well say what you will but you know its true
loves no fun if you play by the rules
say what you will but
I blame me on youSay where you been and i say out with my friends
You say, if they're so great why don't you go sleep with them
Say what you will but i listen to you
I went and slept with my friend Mary Lou
Say what you will but I blame me on youIf life's a highway I think I'll take back roads
You get in my way I run you straight off the road
Say what you will but you ain't no fool
You know my ass is on that old bar stool
Say what you will but i blame me on youSay what you will but i blame me on you
