Hollow

Remy Zero

It felt like the sun
We are hollow
Light to the world
Film star
Define all the ways
We are hollow
I am ghost
You are song
So you walk
Way from me
Were you
Ever there?
You were
Too quick
Or cold to believe
Unbelievable
You can never fail
We can never fail
We can only go down south
In flames a place you forgot about
Oh, we are hollow
Light to the world
Film star
Define all the ways
We are hollow
I am ghost
You are song
Lights that freeze
Turn perfect scenes
Into sorrow
Don't slip away
With all the words
You had to say
You never had a prayer
You can never fail
We can never lose
We can only come down
Sink to your knees
Let the others fire, sound

When I fell out in the traffic
All their voices comin' at me
Comin' on in the street
She was every kind of creature
Every twisted up invention of a human face
We're going in for one more kill
And the sound of their machinery
Devoured so many languages
And all of them said
You'd be so ecstatic
To finally be with it
But fools will win the race
So dive back down to your bed
All your strength
Is about to be found
Crawling up
Out of the ground
Now play what you wanted to play
You say what you wanted to say
You finally found a way
All of the stars coming down
How did it feel
When you
Hit the ground
It felt like the sun
We are hollow
Light to the world
Film star
Define all the ways
We are hollow
I was the ghost
You were song
It felt like the sun
It felt like the sun
It felt like the sun
I was the ghost
You were song
It felt like the sun
It felt like the sun
