

# Hollow

## Remy Zero

It felt like the sun  
We are hollow  
Light to the world  
Film star  
Define all the ways  
We are hollow  
I am ghost  
You are song  
So you walk  
Way from me  
Were you  
Ever there?  
You were  
Too quick  
Or cold to believe  
Unbelievable  
You can never fail  
We can never fail  
We can only go down south  
In flames a place you forgot about  
Oh, we are hollow  
Light to the world  
Film star  
Define all the ways  
We are hollow  
I am ghost  
You are song  
Lights that freeze  
Turn perfect scenes  
Into sorrow  
Don't slip away  
With all the words  
You had to say  
You never had a prayer  
You can never fail  
We can never lose  
We can only come down  
Sink to your knees  
Let the others fire, sound

When I fell out in the traffic  
All their voices comin' at me  
Comin' on in the street  
She was every kind of creature  
Every twisted up invention of a human face  
We're going in for one more kill  
And the sound of their machinery  
Devoured so many languages  
And all of them said  
You'd be so ecstatic  
To finally be with it  
But fools will win the race  
So dive back down to your bed  
All your strength  
Is about to be found  
Crawling up  
Out of the ground  
Now play what you wanted to play  
You say what you wanted to say  
You finally found a way  
All of the stars coming down  
How did it feel  
When you  
Hit the ground  
It felt like the sun  
We are hollow  
Light to the world  
Film star  
Define all the ways  
We are hollow  
I was the ghost  
You were song  
It felt like the sun  
It felt like the sun  
It felt like the sun  
I was the ghost  
You were song  
It felt like the sun  
It felt like the sun
