

Your World

Chris Brown

[Intro:]

Your world

I wanna live in it [3x]

Your world

Your world

[Verse 1:]

(I been)

Chilling on the beach

Down in Mexico

Staring at the lights up in Tokyo

Dancing in Spain as the rain falls down

(I been)

In New York City

Where they never sleep

First class flights on my way to Greece

I been everywhere

And back around

See I been to London

And I been through France

And all that means nothin

If you don't give me a chance

[Chorus:]

Cause it's your world

Yea it your world

That I've never been

Until you let me in

Cause in my world

Yeah in my world

I will never win

Until you let me into your world

[Verse 2:]

I can't stop thinking bout you every night

Picturing your body laying next to mine

What's it gonna take for you to open up

Cause I wanna know everything about your world

I wanna be there when you need me girl

I wanna be more than a fool in love

[Pre-Chorus:]

See I been to London

And I been through France
And all that means nothin
If you don't give me a chance

[Chorus:]

Cause it's your world
Yea it your world
That I've never been
Until you let me in
Cause in my world
Yeah in my world
I can never win
Until you let me into your world

[Bridge:]

Baby let me dive into your ocean
Let me wish upon your shooting star
We gotta put this thing in motion
Bring our two worlds to the same heart

[Interlude:]

Your world
I wanna live in it [3x]
Your world
Come on girl

[Chorus:]

Cause it's your world
Yea it your world
That I've never been
Until you let me in
Cause in my world
Yeah in my world
I will never win
Until you let me into your world

Cause it's your world
Yea it your world
That I've never been
Until you let me in
Cause in my world
Yeah in my world
I will never win

Until you let me into your world

[Outro:]

Your world
I wanna live in it
(I wanna live in it)
Your world
I wanna live in it

(Just need to live in it)
Your world
I wanna live in it
(I wanna live in it)
Your world
(Your world)
Your world
(Your world)
I wanna live in it
Your world
I wanna live in it
Your world
I wanna live in it
Your world
Your world
Your world (your world)
