Give Me More

Pance Party

Give me more
Like that
We watch it settle down
And capitalize on whatever moves
Grab a little bit for your friends
Before they catch you.
You better hide yourself away
Now they've set off to come capture you.
Get rid of that evidence
They're gonna catch you.
Help me decipher
Secrets. please don't tell.
Can I borrow some sugar?
Give me more.
On my own
They're gonna get you
And all stretched out
They're on their way now
It feels like I've been here for hours

And I am all stretched out.
Then when you show your hands
See them glow eight shades of red
Bit late to think of alibis
Just answer the question.
Here's where the truth comes out
Veil lifted, your secrets out
Quit crying innocence
They've already got you.
Help me decipher
Secrets. please don't tell.
Stand up! make us proud!
Carry on your back.
Hold on, you're not done yet
Finish what you started.
Can I borrow some sugar?
Give me more.
[then a chorus, then verse one + two combo, then last chorus]
