

# Give Me More

## Pance Party

Give me more  
Like that  
We watch it settle down  
And capitalize on whatever moves  
Grab a little bit for your friends  
Before they catch you.  
You better hide yourself away  
Now they've set off to come capture you.  
Get rid of that evidence  
They're gonna catch you.  
Help me decipher  
Secrets. please don't tell.  
Can I borrow some sugar?  
Give me more.  
On my own  
They're gonna get you  
And all stretched out  
They're on their way now  
It feels like I've been here for hours

And I am all stretched out.  
Then when you show your hands  
See them glow eight shades of red  
Bit late to think of alibis  
Just answer the question.  
Here's where the truth comes out  
Veil lifted, your secrets out  
Quit crying innocence  
They've already got you.  
Help me decipher  
Secrets. please don't tell.  
Stand up! make us proud!  
Carry on your back.  
Hold on, you're not done yet  
Finish what you started.  
Can I borrow some sugar?  
Give me more.

[then a chorus, then verse one + two combo, then last chorus]
