

Baby Blue

Julie C Myers

Have you got something to tell me
Please come up and tell it to me
Please come up and tell me Baby Blue Have you got a tear or two well
Come on up and tell me do now
You can tell it all now baby blue Really baby don't be shy
It's alright for me to talk to you, you-who
So let it all come out and let it all come through baby blue
Someone has been cruel to you
Someone has been unkind to you
How about you tell me Baby Blue
Who would want to treat you that way
Who could stand to see you that way
Who could make you cry not Baby Blue Oh let it all come out and let it all come through
Ooh Ooh Ooh
Someone hurt you bad
Ooh Ooh Ooh
You don't have to take it so bad When a love lies bleeding
And gentle heart's abused
The summer sky is burning
and you've been feeling used Really baby don't be shy
It's alright for me to talk to you
So let it all come out and let it all come through baby blue Let desire be the fire
To replace love unreturned.
Take your spirit ever higher
With these lessons you have learned No need to visit where you're hurtin'
And stray from path's to new romance.
Desire's light still brightly burnin'
Give love just one more fighting chance. Don't push this love away
Give flight to prayers anew
Another heart waits patiently
Could be the one that's meant for you... Baby Blue
Have you got something to tell me
Please come up and tell it to me
Please come up and tell me baby blue
All you gotta do is tell me
All you gotta do is tell me
Just come up and tell me baby blue
Let it all come out and let it all come through baby blue (Repeat 2x)
