

One More Time

Procol Harum

Good to get your message
So you're coming back home again
Just can't wait to see you
No need to explain A friend of mine told me
That you've found yourself a new man
I'm feelin' really good for you
Hope you understand I've still got your picture
I'm sure you know
We had something special
Oh, where did it go? One more time
Let's remember how good it felt
One more time
Remember what we meant One more time
Can't help wondering, baby, where it went
One more time
Just one more time I wonder if you finished
Workin' on that book
Maybe I could come 'round sometime
And take a look A friend of mine told me
That you've changed your hair
They say you're really different now
I remember how you were I've still got your picture
I'm sure you know
We had something special
Oh, where did it go? One more time
Let's remember how good it felt
One more time
Remember, baby, what we meant One more time
Can't help wondering, baby, where it went
One more time
Just one more time I've still got your picture
I'm sure you know
We had something special
Oh, where did it go? One more time
Let's remember how good it felt
One more time
Oh, let's remember what we meant One more time
Can't help wondering, baby, where it went
One more time

Let's remember, baby, how could you fail? One more time
I'll remember what we did
One more time
Just tell me baby just, just one more time One more time
Oh, help me, well remember how you failed
One more time
Oh
