

# Everyone Like Me

## Thousand Foot Krutch

I've got a lot going on inside  
Don't know if I can work things out this time  
Need a little space to clear my mind  
But I'll be fine  
Don't slip, it's not always this cold  
I'm tired of acting like I know  
Am I searching for the answers?  
No one knows  
And I must confess  
Before I take another step that  
This song's for everyone like me  
Everyone not afraid to stand alone and lonely  
Can you identify with me?  
This song's for everyone like you  
Come and ride with me  
We will not back down  
Wait, it might not be too late  
To avoid the tension we create  
How about I turn and walk away?  
No matter what you say  
It's not a combination  
I've tried to figure you out  
I'm looking for the confirmation  
So I can turn this around  
And I must confess  
Before I take another step that  
This song's for everyone like me  
Everyone not afraid to stand alone and lonely  
Can you identify with me?  
This song's for everyone like you  
Come and ride with me  
We will not back down  
Every time I turn around  
You're looking for attention  
You've taken all the things I've said and  
Throw them away, drank them away  
Every time you show up late  
You're looking for forgiveness  
I must confess

Before I take another step that  
This song's for anyone who ever took a chance  
Who started at the bottom to get to the top  
And no matter what you face in this life  
You gotta know what you're up against  
In order to fight back  
This song's for everyone like me  
Everyone not afraid to stand alone and lonely  
Can you identify with me?  
This song's for everyone like you  
Come and ride with me  
We will not back down  
This song's for everyone like me  
Everyone not afraid to stand alone  
And lonely and lonely
