Liberate Me

A7ie

You had no faith, you had no heart
You wanted more right from the start
We were not the same
You tried to find the demons inside of me
But little did you know I had set them freeWe were not the same
You made me insane
We were not the same
There were never any finger prints to hide
Because your death was a suicide
There was no evidence to find
Because is wasn't me who committed the crime
You took my voice, you took my pride
But now you're gone, so both are mine
We were not the same
You made the wrong moves at the right time
Was it fate or was it just in your mind
We were not the same
You made me insane
We were not the same
There were never any finger prints to hide
Because your death was a suicide
There was no evidence to find
Because is wasn't me who committed the crime
GO!
You tried to lock me down
I found the key
Liberate me
You tried to lock me down
I found the key
I said "You'll never take my freedom away"
And those were the words that made us seperate
There were never any finger prints to hide
Because your death was a suicide
There was no evidence to find
Because is wasn't me
There were never any finger prints to hide
Because your death was a suicide
There was no evidence to find
Because is wasn't me who committed the crime
