Underneath the Surface

Prime STH

Every cut leaves a painful scar
Every wish needs a shooting star
Bruises fade but underneath the surfaceIt all remains just the same, it will stick around
For as long as you keep it alive
And all the hate will finally break you down
It won't heal if you keep it insideEvery lie leaves an open sore
Every deceit gives you hope once more
Bruises fade but underneath the surfaceIt all remains just the same, it will stick around
For as long as you keep it alive
And all the hate will finally break you down
It won't heal if you keep it insideBegging you for more
It will never leave me alone
Always coming back, coming back for more
Why won't you love me?It all remains just the same, it will stick around
For as long as you keep it alive
And all the hate will finally break you down
It won't heal if you keep it insideIt will never leave me alone
Why won't you love me?
