Vagrants in Space

Dreadful Shadows

Contaminated ground beneath our feet
We're walking slowly but hand in hand
We don't care to stumble, we don't care to fall
We're too far away from earthWe don't feel our aching feet anymore
After years and years of running
The long road we covered seems to end right here
We're so close, but too farThere is something better
Something free and new
There's another home for the lost
Where our dreams come trueWe're vagrants in space
We don't care about the dreams around us
Vagrants in space
We don't need deceitfulness to liveWe have tried too long, we have died too long
We have cried too long at all
We believed too long, understood too long
Now our time has comeThere is something better
Something free and new
There's another home for the lost
Where our dreams come trueWe're vagrants in space
We don't care about the dreams around us
Vagrants in space
We don't need deceitfulness to live
