

Don't Start a Band

Reel Big Fish

Don't start a band
Nobody wants to hear, nobody understands
Don't start a band
You'll be so disappointed that it was nothing like you planned
Don't start a band
Oh, yeah yeah yeah I hate to ruin the magic
I hate to kill the dream
But once you've been behind the scenes
Then you'll know just what I mean
You might think that's its cool to get up on stage
And play rock and roll from your heart and soul
But no one shows up and your songs all suck
And there's no applause and no flying cars No girls will scream for you
And no ones gonna stay in love with you Don't start a band
Nobody wants to hear, nobody understands
Don't start a band
You will be so damn terrible they'll all think your shitty
Don't start a band
Oh, yeah yeah yeah
'Cause you wont get paid
And you won't get laid
Yeah yeah And even if you make it
All the way to MTV
I don't think you could take it
All the bullshit and the greed
Everyone is so fake when they shake you hand
And they kiss your ass 'cause then they get cash
And the business end will turn every friend
To an enemy, oh you will see They'll turn their their backs and they'll be gone
Faster than can say, "What did I do wrong" Don't start a band
Nobody really cares, nobody understands
Don't start a band
You will sign your lives away and then you'll be working for the man
Don't start a band
Oh, yeah yeah yeah
Your message will get lost
You'll get double crossed And if you that the joy of playing
Will keep you going through the years
Wait till you poor and frustrated

And the fun just disappears
Nobody cares what you have to say
And no ones gonna listen anyways
Rock and roll will bring you down
And it will kick you while your on the ground
Don't start a band
Don't even try you will regret it, yeah
Don't start a band
You'll be so disappointed that it was nothing like you planned
Don't start a band
Oh, yeah yeah yeah
So just give up now
I'll show you how
Don't start a band
Don't start a band
Don't start a band
Don't start a band
