All I Want Is You

Dan Hill

All I Want is YouI don't want my name in lights
You burn out so fast
You turn to smoke in the night
Baby, all I want is youI don't want no presidential parlor
It's a little too clean in that big white tower
Baby, all I want is youI don't wanna be born again
Rest my soul in your hands
Take my chance in the end
Baby, all I want is youAnd all, all my life I've waited
For you to come along
There's been so many strangers in my life
Filled with the dark spaces of my night
But now the darkness is all goneI don't want no social graces
Get too damn dizzy
Wearing all those different faces
Baby, all I want is you
All I want is youAll, all my life I've waited
For you to come along
There's been so many strangers in my life
Filled with the dark spaces of my night
But now the darkness is all goneI don't want my name in lights
You burn out so fast
You turn to smoke in the night
Baby, all I want is you
All I want is you
All I want is you
All, all, all I want is you
All I want is you
