

# The Dead Next Door

Billy Idol

Watch the sky  
For a reason why  
I will say  
Sunday it was part  
Monday is none  
Monday was none  
For the dead next door One pair of silent terror reins  
And we're the dead next door The heat of the day  
Fade, fades away  
Fades into the night  
The heat of the day  
Suffering a wedding  
Suffering away  
For the dead next door  
You see One error, silent terror reins  
And we're the dead next door In animal land  
When dark is in command  
One thing you should know  
Don't hear that knocking  
Don't eat out of their hand  
Those stumble die  
You see  
Those dumb cry They see you, you and me  
You and me  
With the dead next door  
You and me  
With the dead next door  
You and me  
With the dead next door  
You and me  
With the dead next door
