

Say the Words

Usher

I had a dream when I was just a little boy
To find a girl like you
We would meet at the park at school
And talk till the day was through
Then take a trip to your parents' house
And I would comb your hair
And we would dream of all the cities
And places we could go Oh, oh, oh
Say the words that you know I won't hear
Put your heart up close to my ear
We don't need to know the time
We could stay till the days turn to night I can still remember dreams as a little boy
Now I'm a man and still can't write down my toes
Hey, hey, hey
Real love will never come if you're in it now
But I had to learn that lesson down in the sub
Back to spending nights on the town just to have a little fun
In my mind I'm wishing she's the one
(I said to myself)
Is this too close to reality
For you to be that girl from my fantasy Oh, oh, oh
Say the words that you know I won't hear
Put your heart up close to my ear
We don't need to know the time
We could stay till the days turn to night She stole my heart and let's go play the dream again
Uh, uh, to find a girl like you
(Only you and me around)
I look into your eyes
I might see a universe, you and I are intertwined
I look into your eyes
I might see a universe,
Love is pure, so divine Oh, oh, oh
Say the words that you know I won't hear
Put your heart up close to my ear
We don't need to know the time
We could stay till the days turn to night Say the words that you know I won't hear
Put your heart up close to my ear
We don't need to know the time
We could stay till the days turn to night This is dedicated from the fire we'll write

To my one and only little love
I will never, ever, ever love again This is dedicated
To my one and only little love
Only girl I'll ever love
