Caught Up

Young Ed

CHORUS:
Caught up
Fists balled up
Fight for what?s right, that?s how I was brought up
Brought up
Heart so tough
Felt love, now my emotions are caught up
Break up to make up is all we do
For the past five years it?s been all about you
I aint even been able to do my du
Cause all day and night my mind been on my boo
But certain situations got me late-night pacing
I know it all started when I missed your graduation
Handcuffed, back seat, on my way to the station
Alcohol on my breath, bout to add to my cases
That was my fault, but the rest was you
Yeah, I missed my first million cause I left with you
But it was all about feelings when I stepped to you
Now I?m chopped up feeling like a vegetable
CHORUS
And you know I?m not abusive but sometimes you make me lose it
Never put my hands on you though sometimes I wanna do it
Got my mind mixed up, like my brain?s in the blender

I remember when we both made the change for the better
Now we back to our old ways trying to stay together
What happened to the sunshine through the bad weather
You wear mad leather so I know that you?re depressed
And I?m smoking a pack of cigs a day from the stress
When we first met you was my lifetime partner
My life crime partner, my wife my honor
But now I?m feeling like George Bush and Osama
We gotta stop this shit put an end to this drama
CHORUS
And all your girlfriends they just snakes in the grass
Tellin? you to dump me but tryin to holla when I pass
I just sit back and laugh, they don?t know what you got
I?ma ride when things good, and I?ma ride when they not
And before I pack it up I hope that we can patch it up

I know I say I love you, but baby I can back it up
And I hope you can too, cause I?m your man, boo
Aint nobody gonna care about you like your man do
And I realize it?s destiny, fate got the best of me
I knew it ever since the first time you had sex with me
Give it another chance, hopefully we?ll make it last
Start it all over, leave the rest in the past
CHORUS
