

Like Lovers

Striking Matches

All the things that we said
Did we mean them?
Every night, every kiss
Did we dream them?
But before we decide

What is mine, what is yoursLet's talk without words

Let's lie with each other
Let's drive coast to coast
And hide under the covers

Make a million years of memories
For one another
Then let's walk away

Like loversAt the start, we were cool

We were burning
Didn't know, couldn't care
If the Earth was still turning
But the flame doesn't burn
As bright anymore
Before it fades out

Let's dance just once moreLet's talk without words

Let's lie for each other
Let's drive coast to coast
And hide under the covers

Make a million years of memories
For one another
Then let's walk away

Like loversSo hold onto me, remember me

If we're gonna go, let's go gracefully
Just walk away

Like loversLet's talk without words

And lie to each other
Let's drive coast to coast
And hide under the covers

Make a million years of memories
For one another
Then let's walk away
Like lovers
