A Night Polaris

A Dream Too Late

If I reached the end would it
Ease my mind to leave it with you?
And memory please remember me
Because you're all that I haveI can stand alone, if all on my ownForget our names
Let's escape from this fading world
Run for cover, we'll run for coverDon't watch this die
Save your eyes from this burning world
Run for cover, run for coverI wanna go but there's no where
To stay outside of your love
And I have to live with the things
I say but nothing is mineI can stand alone, if all on my ownForget our names
Let's escape from this fading world
Run for cover, we'll run for coverDon't watch this die
Save your eyes from this burning world
Run for cover, run for cover, yeahRun for cover, run for coverForget our names
Let's escape from this fading world
Run for cover, we'll run for coverDon't watch this die
Save your eyes from this burning world
Run for cover, run for coverForget our names
Let's escape from this fading world
Run for cover, we'll run for coverDon't watch this die
Save your eyes from this burning world
Run for cover, run for cover
