So Long Friend

Gym Class Heroes

Today I wasn't even gonna take a shower
And then I got a call sayin' that my cousin died in a fire
So I washed myself for what seemed like three hours
With tears in rusty waterI need some of that calgon, take me away action immediately
'Fore I start scrubbin' my hands hard repeatedly
I'm stuck somewhere lethargic between reality
In a fuckin' school videoWake me upI say goodbye too many times in these 22 long ones
Here I am wavin' again, "So long, friend"
I shoulda told her how this town doesn't like when people leave
So it finds ways to keep 'em, it sews seeds and reaps 'emAnd now she's part of that harvest, different from all the others
Ask her mother how her smile touched souls and warm cold hearts
Monique, I miss you, I wish I coulda kissed you farewell
And given you that tattoo you always asked forBut when I'm done tappin' bud lite on God's stomach
You got next, I'm done, y'all take what you want from me
I'm going to wash my hands, I miss you boo
