

Someday You Might Love Me

Jai Rodriguez

Once upon a time
You'd all come to me
I'd do anything for you
Whatever it might be
Now you all point and laugh
You seem so amused
But I don't know what I have done
Help me... I'm confused
You clapped and cheered for me
The whole year through
And though so much has changed
I haven't... have you
I taught your hearts how to love
Your souls how to kiss
I taught you all that I know
I didn't teach you this
Someday you might love me
Someday you might care
Someday you might come and find me
And find that I'm not there
We gathered for a moment
And we laughed and cried and played
From now on the magic's gone
This is what it made
How can you look into me
And not see yourselves how
Man, woman, gay, straight
All things in between
I leave no one out
Someday you might love me
Someday you might care
Someday you might come and find me
And find that I'm not there
Someday you might come and find me
And find I'll still be there
