Leech

Katie Carroll

Are you still pathetic
Do you still lie
To keep all your problems away from your eyes
You could be anything, but you're just a waste
You eat the dirt on your plate

Lost in a search
You got nothin' from me
But someone to save you from your misery
I'll never go back
I'd rather be dead
Your hell is a chain in your head
Or maybe I'll kill you instead

(chorus)
You're just a leech
And your love's a disease
You never gave anything
But you take all you need
A bandage
To cover up your old injuries
There's no getting back to the past
But it's always there to bite you back fast

I stole your motto
Unplugged your machine
All while you snipered away from your dream
Who are you now
Are you set in your ways
We all pay the price of our days
I'm up on the mountain
You're down in the ditch
When I try to help you
You call me a bitch
I see what you're thinkin'
You know you're outdone
You started a fight but I won

You're just a leech
And your love's a disease

You never gave anything
But you take all you need
A bandage
To cover up your old injuries
There's no getting back to the past
But it's always there to bite you back fast

You were the dream that was always a lie
What if you died and left nothing behind
I'll never die if I make up my mind
I'll never die if I make up my life

You're just a leech
And your love's a disease
You never gave anything
But you take all you need
A bandage
To cover up your old injuries
There's no getting back to the past

You're just a leech
And your love's a disease
You never gave anything
But you take all you need
A bandage
To cover up your old injuries
There's no getting back to the past
But it's always there to bite you back fast
