

# Point of You

## Measure

Pick us apart  
What are you made of now?  
You knew at the start  
But everything's turned around

So where is your heart?  
When you ignore the sound  
Beats on in the dark  
Waiting for the turn around

So what is your point of view?  
What is the point of you?  
What is your point of view?  
What is your point?

So this is your heart  
Already on this light  
When you don't start  
When you don't walk away

So what is your point of view?  
What is the point of you?  
What is your point of view?  
What is your point?

What is your point of view?  
What is the point of you?  
What is your point of view?  
What is your point?
