Veil

Inventions

Oh you are so complicated
Building webs to see them shine in dappled light
You take something simple and ornament
Just to reflect your eyes and your view of perfection

Maybe this is make believe, a dream
Something you can't keep
But if you let me I'll take you with me
Maybe this will fade away

You resent the feel of sun on your skin
It's so warm but you crave the cold
I have seen it blaze in your eyes, it looked nice there
I have seen the look of surprise

Let's just sit here for a while
And watch the clouds
You'd never risk your heart
For anyone like me
