

# Veil

## Inventions

Oh you are so complicated  
Building webs to see them shine in dappled light  
You take something simple and ornament  
Just to reflect your eyes and your view of perfection

Maybe this is make believe, a dream  
Something you can't keep  
But if you let me I'll take you with me  
Maybe this will fade away

You resent the feel of sun on your skin  
It's so warm but you crave the cold  
I have seen it blaze in your eyes, it looked nice there  
I have seen the look of surprise

Let's just sit here for a while  
And watch the clouds  
You'd never risk your heart  
For anyone like me
