

I Can't Control My Heart

Hank Snow

Though I should say goodbye to you I can't control my heart
It won't obey my heart must stay with you
You brought me a tear with each kiss you gave to me
You taught me how painful love can be
It makes no difference what you do I can't control my heart
And though you stray my heart must stay with you
But you alone it's beating I love you it's repeating
With all my soul I can't control my heart
[fiddle + guitar]
You brought me a tear with each kiss you gave to me
You taught me how painful love can be
It makes no difference what you do I can't control my heart
And though you stray my heart must stay with you
For you alone it's beating I love you it's repeating
With all my soul I can't control my heart
