

Blinded (Sebastian Brandt Remix) [feat. Laurie]

Masoud

A city ripe with fallen angels
Wounded souls on vacant streets
The faces could be anyone of us
Faces we're too scared to meet And they're reaching for a hand
We turn the other way
Pretend that we don't see
Don't know what to say The struggle still remains
To find the strength inside
To do what's right We've been blinded, oh
Let's rewind and go to a time before
We were blinded, oh
Let's rewind and go to another time In every face is my reflection
We are all one in the same
Different phases and directions
Intersecting the same plane And they're reaching for a hand
We turn the other way
Pretend that we don't see
Don't know what to say The struggle still remains
To find the strength inside
To do what's right We've been blinded, oh
Let's rewind and go to a time before
We were blinded, oh
Let's rewind and go to another time We've been blinded, oh
Let's rewind and go to a time before
We were blinded, oh
Let's rewind and go to another time
